Professional Summary

Computer and data science professional focusing on machine learning and artificial intelligence in industry. Proven ability to deliver impactful projects. Successfully deployed commercial applications. Complete ML lifecycle experience, from designing data solutions to deploying predictive models. Exceptional academic performance (4.0 CS GPA) with practical experience in research, development, and customer-facing positions. Media and CIO recognition for innovative project delivery.

Work History

TECHNOLOGY AND INNOVATION INTERN

05/2025 to 08/2025

CareTechPros, San Francisco Bay Area, CA

- Constructed a Google Chrome extension leveraging TypeScript and React to optimize LinkedIn recruiting, saving **15 hours per week** for recruiters, thereby enhancing candidate engagement.
- Engineered and integrated an AI-powered response generation feature using Ollama, improving recruiter efficiency by **50%** through automating initial candidate outreach messages.
- Implemented secure user authentication via OAuth, ensuring data privacy and seamless integration with LinkedIn.

UNDERGRADUATE DATA SCIENCE RESEARCHER

08/2024 to 05/2025

The Data Mine Corporate Partners, West Lafayette, IN

- Led machine learning research project with Sandia National Lab, developing sophisticated flight trajectory prediction algorithms achieving **85%** accuracy through advanced Python implementations and deep learning techniques.
- Designed optimized data storage architecture utilizing k-d trees and R-trees, improving query performance by **30%**.
- Collaborated with cross-functional research teams using Agile methodologies, consistently meeting project milestones.

RETAIL SALES ASSOCIATE

06/2023 to 08/2023

Best Buy, Greater Pittsburgh Region

- Exceeded sales targets by **20%** through expert technical consultation and product recommendations.
- Implemented data-driven merchandising strategies, contributing to a **15%** increase in department revenue.
- Maintained a **90%+** customer satisfaction rating while managing over 10 technical consultations per hour during peak times.

SOFTWARE ENGINEER INTERN

06/2021 to 08/2021

SAE International, Warrendale, PA

- Developed and deployed **3** critical application modules for internal systems using modern development tools, including the Akira UI/UX design application.
- Received commendation from the Group CIO for exceptional project delivery and rapid development skills.

Skills

- Programming Languages:** Python, Java, C/C++, JavaScript, TypeScript, SQL
- Machine Learning:** TensorFlow, PyTorch, CNN Models, Neural Networks, Random Forests, Deep Learning
- Development Tools:** Git, GitHub, VS Code, Flask, Unity Engine, AngularJS, .NET
- Core Competencies:** Full Stack Development, API Integration, Agile/Scrum, Technical Leadership, Data Structures, Cloud-Based Design

Selected Projects

- Music Genre Classification System:** Engineered a CNN-based system in Python using TensorFlow, achieving **90%** prediction accuracy across 10 distinct musical genres from audio spectrograms.
- Meme Generator Platform:** Built a full-stack web application with an intuitive user interface, enabling users to create and share memes from a variety of popular templates.
- Poker AI Bot:** Designed a full-stack application featuring three distinct poker AI agents with varying difficulty levels and multiplayer functionality for human-vs-AI gameplay.

Education

Purdue University, West Lafayette, IN

Expected 12/2027

B.S. in Computer Science & Data Science (GPA: 3.84 | CS GPA: 4.0)

- Honors:** Dean's List, Data Mine Corporate Partners Research Program
- Key Coursework:** Computer Architecture, Data Structures and Algorithms, Object-Oriented Programming, Intro to AI, Data Mining and Machine Learning, Information Systems, Systems Programming
